

## PRODUCT BRIEF

### MBS-FMK-01 Flush Mounting Kit

February 2006

The **MBS-FMK-01** is a bundled product consisting of a flush-mount housing and sealing label for use with the range of Diligent standalone surveillance cameras. It enables the camera to be mounted on any flat surface for user specific or covert surveillance applications

The housing is manufactured out of high quality black Acetal and can be glued or screwed to the front surface.

The camera is held in position by a base plate and a magnetic strip mounted on both the camera and front case. This enables easy replacement and removal of the camera to access the memory card.

The unique polycarbonate sealing label supplied with the kit can be adhered to the surface in front of where the camera is mounted. It has optically clear windows for the camera, infrared receiver and LED, as well as a special infrared transparent insert for the motion sensor.

For covert surveillance, normally only the camera and motion sensor holes are used.

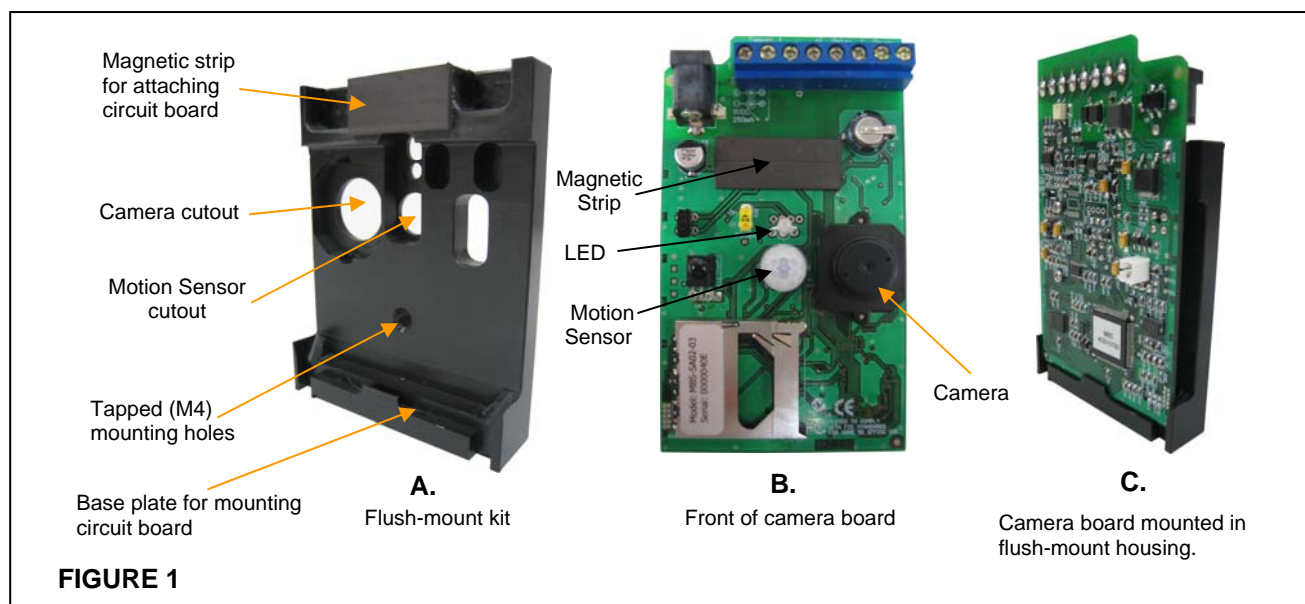

The label is abrasion, chemical & solvent resistant and has a matt finish to reduce reflections so as to keep the case inconspicuous. It is coated on one side with an industrial quality super adhesive.

#### □ FEATURES

- Easy replacement and removal of camera due to unique magnetic mount.
- Inconspicuous clear sealing label with matt finish and high quality super adhesive.
- Label is abrasion, chemical, and solvent resistant polycarbonate.
- Ideal for Lever Arch Folders, Steel Bollards, ATM's, and Vending Machines.
